Master Techniques In Surgery: Gastric Surgery

Synopsis

Master Techniques in Surgery: Gastric Surgery is a volume in a new series that presents common and advanced procedures in the major subspecialties of general surgery. The series is overseen by Josef E. Fischer, MD, editor of the classic two-volume reference *Master Techniques in Surgery*. *Master Techniques in Surgery* is written by acknowledged master surgeons, emphasizes surgical procedures, and is lavishly illustrated with original full-color drawings. The contributors fully explain their preferred techniques in step-by-step, thoroughly illustrated detail, assess indications and contraindications, offer guidelines on preoperative planning, and discuss outcomes, complications, and follow-up. This volume covers surgical procedures of the stomach and includes sections on procedures for ulcer disease, procedures for neoplastic disease, operations for postgastrectomy syndromes, bariatric operations, and other gastric operations. A companion website will offer the fully searchable text and procedural videos.

Customer Reviews

I dislike the absence of step by step photos of each procedure. It is essential to start with a schematic description of each step of each procedure and, on the side we have the drawing/design and the photo of each step.

The pacing form of this book is satisfactory for preceding in the prompt procedure of developing

intro surgery. I found it of assistance in descriptive innovation.

Expertises are very Good and give me answers that i am looking for!

I still reading the book but it is very useful, with good illustration and contents. The only problem is to read it in my tablet. On the desktop no problems!!'m trying to solve it with lippincot customer assistance.
