Sensation And Perception, Fourth Edition

Synopsis

Why does the sky look blue? Why does sugar taste sweet? Can my dog hear the same things I hear? 'Sensation & Perception' is written by experts in each of the five senses who have a passion and enthusiasm for conveying the excitement of this field to students.

Customer Reviews

It's a textbook. An extremely dry, but very detailed textbook. Good condition. Textbook prices always suck. I just had to bite the bullet because my professor is an unrelenting slave driver than insisted that it was necessary.

It's a textbook, so what can you expect? However, this one was especially dry. We used it for a college class on Perception, and although the class and the material was fascinating, this textbook made everything much more boring. I would delay reading from the text because I really did not enjoy it. I found much more helpful sources for Perception online that did not make me regret taking the class, so this book is needlessly dull.

Great textbook! I wish we had more than one semester to go through it as it is FULL of complicated concepts and systems, but very comprehensive and the online partner site is ideal!

Great information.. Extremely dry to get through. Doesn't hold my attention and it's hard to study

from.

I should write a bad review, because I hate school and textbooks, but it was in good condition

i mean regardless of the dry content of the book, it was delivered quickly and is spotless :)
